Cu Xuan Hung

Java Backend Developer

0868909998 cuhungedu@gmail.com github.com/hungcxhe191035 Ha Noi,Viet Nam

CAREER OBJECTIVE

A dedicated Backend Developer with **6 months of hands-on experience** in building robust RESTful APIs using Java and Spring Boot at FPT Software.Currently seeking a **Full-time / Part-time Backend Developer** position to contribute my technical expertise while continuing to grow and tackle challenging software architectures in a professional environment.

SKILLS

Programming Languages:	Java (Core, Java 8-21), JavaScript , HTML5/CSS3, SQL.
Frameworks/Libraries:	Spring Boot 3, Spring MVC, Spring Data JPA (Hibernate), Spring Security (RBAC, JWT/BCrypt).
Methodologies & Others:	RESTful API Design, OOP, Agile/Scrum.

WORK EXPERIENCE

Company: FPT Software 08/2025 - 02/2026

Job Title: Backend Developer

- Reviewed and strengthened foundational knowledge of Data Structures and Algorithms (DSA), Advanced Java, and Agile/Scrum methodologies.
- Developed a comprehensive Mock Project reflecting real-world business requirements, applying Spring Boot and SQL Server under the guidance of a Technical Mentor.
- Integrated into a development team to shadow Senior Developers and experience real project workflows.
- Contributed to real-world projects by writing Unit Tests (JUnit/Mockito), fixing UI/Backend bugs in the Staging environment, and participating in Daily Scrum meetings.

ACADEMIC PROJECTS

My Learning Path (E-Learning Platform) 04/2026 - Present
https://github.com/hungcxhe191035/project-6-learning-path

Architected the core Backend system utilizing Java 21, Spring Boot 3, and SQL Server.

- Advanced Database Design: Implemented a **Data Versioning Pattern** to seamlessly separate Draft and Published course states.
- Deployed **Spring Security** (BCrypt, RBAC) to establish robust access control for Students, Instructors, and Admins.
- Integrated **AWS S3** to engineer scalable I/O services for large multipart file uploads (videos and thumbnails).
- Collaborated with Frontend team via **Git/GitHub** to design and integrate asynchronous RESTful APIs (AJAX).

FPTU Library Management System 05/2026 - Present
https://github.com/BuiMinhChien/HSF302_FPTU_Library_System

Java 21,Spring Boot ,Spring Security ,Spring Data JPA ,Thymeleaf ,SQL Server.

- Developed **View Borrowing History** with optional keyword search via **JPQL @Query** and **Pageable** pagination.
- Built **Manage New Book Request** — Reader creates/cancels requests with status filtering and session-aware data isolation.
- Implemented **Approve New Book Request** — Admin/Librarian approves or rejects requests with @Transactional consistency.
- Designed **Manage Account** — Admin manages users with **Spring Security RBAC (BCrypt, role-based URL protection)**.
- Collaborated via **Git/GitHub** with feature branching and Pull Request workflow.

EDUCATION

FPT University 2023 - Present

Major: Software Engineering

Toeic: 555

GPA: 3.0/4.0
